

easyroot

WHAT IS THE TECHONOLOGY BEHIND THE EASYROOT?

1. 5.000G's of acceleration.
2. Magnetic-dynamic thrust.
3. Advanced electronic controller that allows the doctor to easily control the forces with simple turn of a dial.

Osseotouch's solution to more conservative and atrumatic dentistry was designing Easyroot, using the new Magnetic-dynamic technology.

It is a big step forward compared to manual instruments .

01

CONSERVATIVE

It moves, replaces, re-shapes and condenses the bone. It never removes the bone, leaving soft tissues untouched.

02

SPEED

The Magnetic-dynamic impulse delivers much more force than manual tools. This means increased effectiveness during a procedure.

03

PRECISION

The kinetic energy forces are delivered precisely to the treatment area limiting dispersion to the craniofacial mass. This level of precision provides more comfort for the patient during the procedure.

“The EasyRoot has definitely improved my confidence and speed with difficult extractions. I also appreciate that it has helped make all extractions easier on my body with less wear and tear on my hands and arms. The EasyRoot is a no brainer for anyone who extracts teeth.”

Dr. Carson Kutsch, Kutsch Dentistry;
Albany, Oregon

“Thanks to Easyroot the concept of atraumatic extraction is realized, with absolute absence of discomfort for the patient.”

Dr. Franco Motta,
Italy.

STARTER KIT

EZ EXTR1

EXTRACTOR 1
Sharp and durable

EZ EXTR2

EXTRACTOR 2
Reduced height and
concave profile

EXPELL

EXPELLER
Double inclination

All extractors are 11mm off-set for better access to posterior regions

OPTIONAL KIT

EZ EXTR3

EXTRACTOR 3
Total height
- Concave profile

EZ EXTR4

EZ EXTR5

EXTRACTOR 5
3rd Molars luxation
- Thick lever

Meta Ergonomica, located in Turbigo (Milan), Italy, has developed and patented the use of Magnetic-dynamic forces in oral surgery. Its mission is to design and manufacture medical devices that allow implementation of procedures in controlled, precise and conservative manner.

Meta Ergonomica is ISO13485:2016 certified by Tuv Rheinland S.r.l. (1936).
